

DECKING WOOD SCREWS

Premium coarse threaded screw with excellent holding power for fixing a wide range of decking timbers.

Specifications/Features	
Head style	Raised head and Countersunk head
Recess	Torx drive T-25
Materials	Stainless steel T304/T316 and bronze coloured T304 stainless steel

Gauge/Size	Length	Recommended Embedment mm	Pull-Out kN
8g (4.2mm)	50mm	33	3.68
	65mm	43	5.22
Shear strength		5.30 kN	

10g (4.8mm)	60mm	40	4.52
	75mm	50	5.32
Shear strength		5.70 kN	

12g (5.4mm)	75mm	50	5.74
	90mm	60	7.30
Shear strength		6.70 kN	

- We recommend pre-drilling into any hardwood timbers to prevent splitting and cupping.
- We recommend to use T316 screws for some hardwoods which contain high tannins to minimise the risk of black staining around the screws on the timber. If staining occurs use of oxalic acid may help to reduce or remove it.
- All data based on average loads, pull-out values will vary depending on the timber used.
